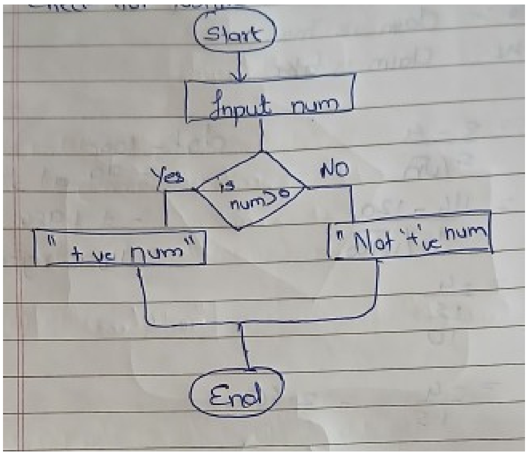
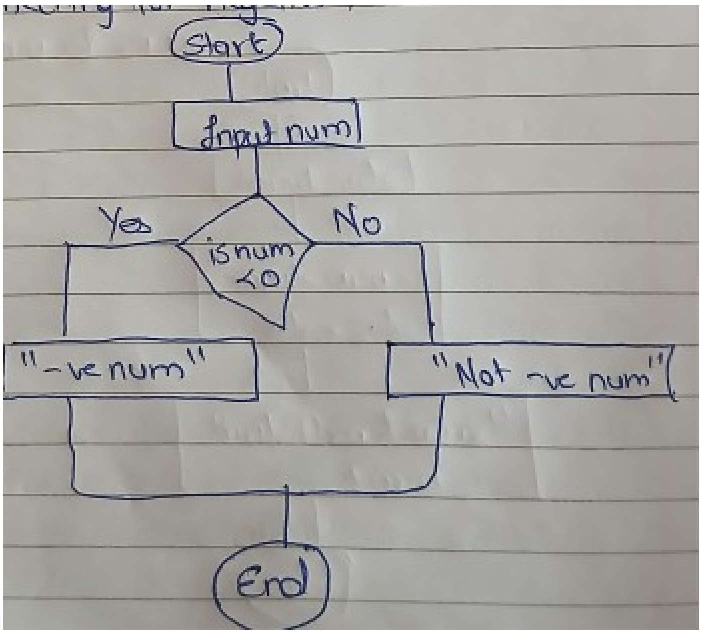
1. Check For Positive Numbers



Code

```
public class CheckPositive {
    public static void main(String[] args) {
        int num = 5;
        if (num > 0) {
            System.out.println("Positive Number");
        } else {
            System.out.println("Not a Positive Number");
        }
    }
}
```

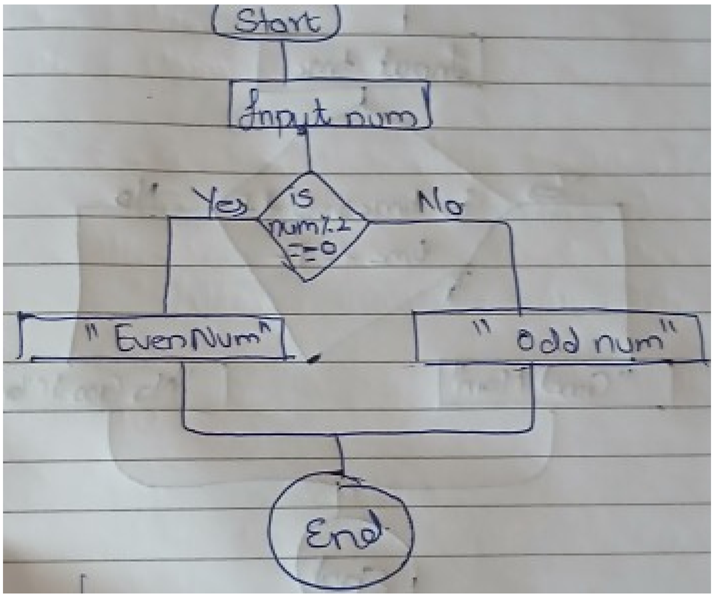
2. Check For Negative numbers



Code

```
public class CheckNegative {
    public static void main(String[] args) {
        int num = -3;
        if (num < 0) {
            System.out.println("Negative Number");
        } else {
            System.out.println("Not a Negative Number");
        }
    }
}
```

3. Check For Odd Even Number

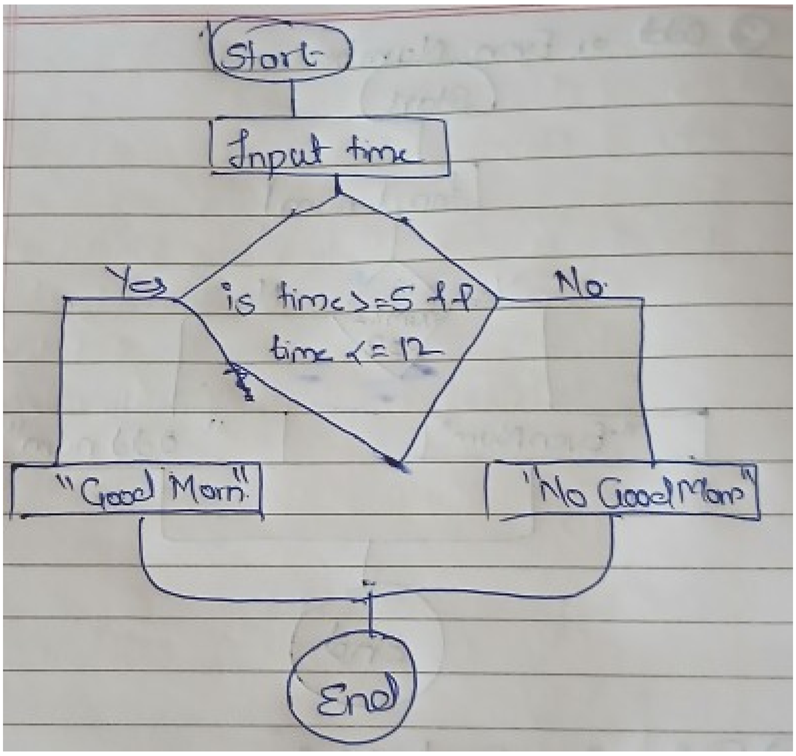


Code

```
public class CheckOddEven {
    public static void main(String[] args) {
        int num = 8;
        if (num % 2 == 0) {
            System.out.println("Even Number");
        } else {
            System.out.println("Odd Number");
        }
```

```
    }
}
```

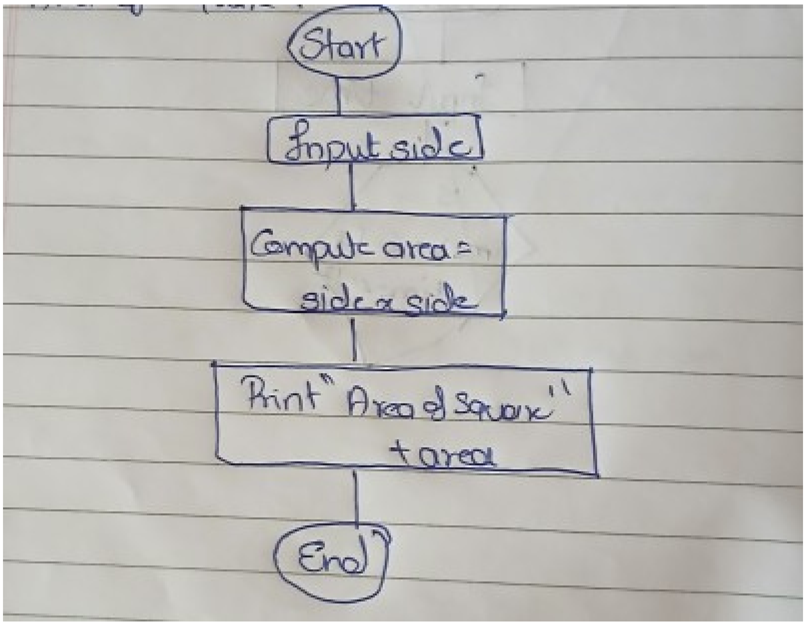
4. Display Good Morning Message Based on Time



Code:

```
public class GoodMorning {
    public static void main(String[] args) {
        int time = 10;
        if (time >= 5 && time <= 12) {
            System.out.println("Good Morning");
        } else {
            System.out.println("No Morning Message");
        }
    }
}
```

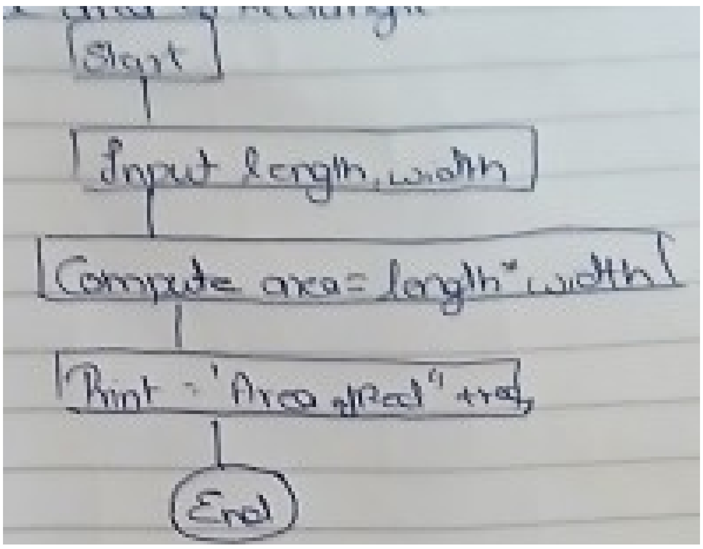
5. Print Area of a Square



Code

```
public class AreaRectangle {
    public static void main(String[] args) {
        int length = 5, width = 3;
        int area = length * width;
        System.out.println("Area of Rectangle: " + area);
    }
}
```

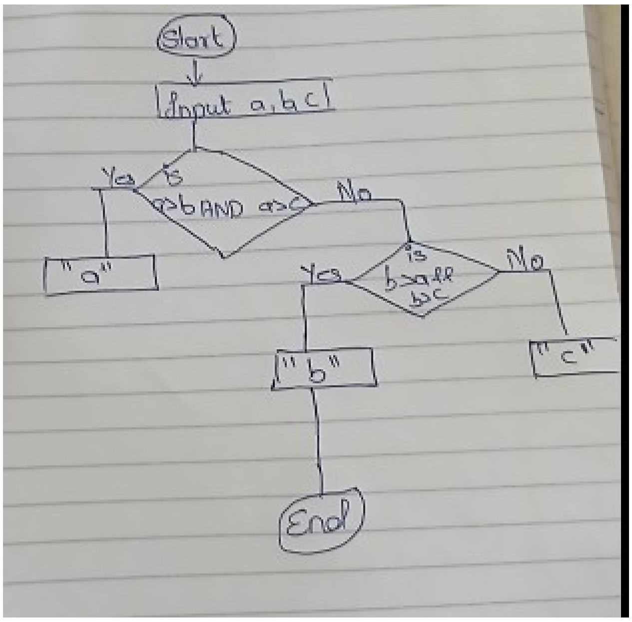
6. Print Area of a Rectangle



Code

```
public class AreaRectangle {
    public static void main(String[] args) {
        int length = 5, width = 3;
        int area = length * width;
        System.out.println("Area of Rectangle: " + area);
    }
}
```

7. Find the Largest of Three Numbers



Code

```
public class LargestNumber {
    public static void main(String[] args) {
        int a = 10, b = 20, c = 15;
        if (a > b && a > c) {
            System.out.println("Largest Number: " + a);
        } else if (b > a && b > c) {
            System.out.println("Largest Number: " + b);
        } else {
            System.out.println("Largest Number: " + c);
```

```
        }
    }
}
```
